Present College: _____

Engineering Major to be declared: _____

Student Signature: _____

Date: _____

=====

Non-UIC students must apply to UIC following instructions in the Application for Admission and the current Undergraduate Catalog.

The College of Engineering has a higher tuition differential than most other colleges. Being admitted as an Intercollege Transfer Student will usually result in a higher tuition bill.

The admission requirement to transfer into the College of Engineering for a current UIC student is a minimum GPA of 2.5 for Illinois resident (as defined in UIC Undergraduate Catalog) and 2.75 for nonresident. Both UIC cumulative GPA, and the GPA for science and math courses, must meet this requirement. The recommended science and math coursework for most majors includes CHEM 122/123; PHYS 141, PHYS 142; MATH 180, MATH 181, MATH 210, MATH 220. Computer Science applicants have additional science choices: BIOS 100, BIOS 101; CHEM 116; EAES 101.

Each petition will be reviewed on an individual basis, and admission will be based on space available in the Engineering major chosen by the student, the student's overall academic record, progress in relevant science and math courses, and the student's demonstrated potential for success in the Engineering major. You will be informed of the decision by mail.

Please return this form to the College of Engineering Undergraduate Affairs office located in room 123 SEO, via fax at 312-413-3365 or as an email attachment to jmuench@uic.edu.

IN MOST CASES A DECISION WILL NOT BE MADE UNTIL YOUR CURRENT SEMESTER GRADES ARE AVAILABLE
